

The Constitution for the united States of America

Hi, Paul,

Monday night people saying this document is very rare. I happened to squirrel a copy. The place I got it is indeed gone. I thought you might like to host it and send out an email, and forward the docs to other webmins to avoid the risks of a single source disappearing. Thanks!

Barry

Hi Barry,

I will keep this on file, and if it proves to be the genuine article we have been looking for I will publish it as you see fit.

I then forwarded the documents to Anna and this was her response.

Yes, thank you!!! This is a printed copy of the text of the real McCoy that was written on vellum in India ink and then published and distributed via printing press—- this version.

Please share on the website and Teri, you, too.

There is a vellum copy in the Northeastern United States and a British Lord has original copies of all the documents and has them in safekeeping.

They — the vellums—-are very fragile and important in the current scenario —and hard to read— but this is a valid copy of what was published and distributed at the time.
