Dear Barbara,

I have just read 2 posts of yours which seem to overtly defame and slander me, one made last July and one made last December, it looks like.

https://barbarahartwellvscia.blogspot.com/2022/07/warning_zero_tolerance_for_gossip.html

https://barbarahartwellvscia.blogspot.com/2022/12/preposterous_sensationalist_boasts.html

The first seems to take offence at words in an email sent by me to Geral and forwarded by myself to Cassandra which you appear to have been given by her and which it appears you have misread. I am very sorry you have both misread the intent and content of this email and that you have made a public post in July accusing me of things which are not true.

The second highlights a post I made last December when in the throes of extreme energy and neurotechnology attack directly following the publication and send out of my Living Testimonial re. April 2022 to numerous government parties. This was whistleblower retaliation, and it has continued; I have still not published the full account of what has been done to me and my family directly following my whistleblower journalism of the preceding 9 years, in particular the very important panels I conducted to expose numerous DEW/Neurotechnology/MK Ultra crimes as attested to by numerous witnesses, whistleblower scientists, and victims of same, the first in August 2021 and the second in October 2022.

Please know I have been extremely physically harmed by this retaliatory action, as well as psychologically devastated. I have not spoken of all of it publicly for reasons of family privacy. I am working privately to address much of the harms directed against me including a few false psychiatric labels wrongfully associated with my name from doctors and psychiatrists starting from 2013. These are private matters, and like you, I am very keen to preserve my own, my family's, and everyone else's privacy as I address these matters: today, mental and behavioral healthcare is being used as a weapon against all of us while giving doctors and psychiatrists infinite unwarranted power to name anyone they please (including journalists like me exposing energy weapon crimes) mentally ill, mentally unstable, delusional, paranoid, and so on, so as to permit the CIA, DOD, DARPA, DIA, NSA, FBI, MI6, NATO, and others to use them as target practice for their infinitely perverted neuro, AI, brain, nano, bio behavioral, psychological and other medical experimentation and weapons projects, all while pretending they are doing this to save these poor souls from themselves since apparently we're all so sadly mentally incapacitated that we actually don't need to consent to being brain slaughtered and body assaulted as well as multiply defamed for life to further these CIA Psychs's careers in sadism.

Please be aware therefore that I continue to respect privacy for all of us, you and our two mutual friends included, both copied here; your statements regarding possible defamation of yourself by me to possible other of your friends

are unwarranted, since as you may know, these are the only two friends we share, and I have always and continue to respect and honor these very special friendships, since, as far as I know, we are all victims of political persecution of different kinds, and we are all whistleblowers, too, whether as former US Gov agency employees or as journalists or as reporters of corruption. You are all also much-trusted and greatly supported and loved interviewees at my channel and website, and I have publicly platformed and highlighted your words and work, which are indeed greatly needed for all citizens in the USA, UK, and worldwide to hear. I continue to uphold and support your profoundly important testimonials as a former CIA officer and whistleblower as I also do Gerald's as former FBI Special Agent, Judge, Military Veteran and Cassandra's as an outstanding journalist, writer, and reporter of targeting/harassment crimes in the UK. I hope indeed that my work as a journalist to surface your vital voices and words into public awareness has helped keep you all safe from the greater harms of being retaliated against or persecuted in private.

I do reserve the right however--as do you--to my own opinions as a writer and journalist: the term "targeted individual" has always been problematic to me but I have certainly championed the cause of all victims of unlawful watchlisting, nonconsensual experimentation, and counter-personnel directed-energy weapons testing operations as well as neurotechnology/cognitive warfare operations which to me, from my understanding as a journalist, seem to have been directed at both civilians and former government and military and intelligence employees, as also at myself--as a writer, mother, former college faculty member, art, natural science and creative writing teacher--which propelled me to become an investigative and advocacy journalist in this field. The particular words from your own article which I found personally problematic and which I mentioned as such, mildly, if I recall, to our two friends, always giving you the benefit of the doubt, had to do with the doubting of those targeted with energy/neuro technologies as credible reporters of the very crimes of unlawful targeting by weapons-testing operations and other black operations which have indeed (by their report and my own experience) sought to persecute, harm, and literally kill; I paste this text below, as you have it.

While I agree with you there are many charlatans out there posing as victims in order, I think, to draw others into or drown people inside these unlawful projects, it is not fame and fortune that the real, true victims are seeking when they report these horrific life-takedown crimes publicly: our lives have been taken down, and we have been made to suffer as we continuously try to survive and rebuild our lives. That said, let me also say I do not speak of or see myself as a "targeted individual" which has become a Label of Harm, but as someone questing, sensitive, caring, thoughtful, a writer, a teacher, an artist, a scholar, a mother, a human rights and animal-caring advocate and activist who has been unlawfully watchlisted, attacked, and exploited as well as grievously persecuted as a journalist and advocate for others for 8-9 years now. No-one should be using this label—it has been set in place by very harm-intending military and intelligence factions, and it has become synonymous with "mental illness" thanks to CIA/DOD and public-domain psychiatry which I continue to expose. Deriding those who are indeed being persecuted with actual energy weaponry and neuroweaponry harms all of us.

Please remove these two defaming posts made against me and against the entire edifice of my fact-based journalism which exposes these targeting and persecution crimes against many. I will have to address this on my own website if not. I absolutely will not have my name as a writer and journalist exposing these harmful crimes against me and others defamed, slandered, and brought down. I am extremely sorry you, my friend and sister in reporting CIA/DOD persecution and COINTELPRO operations against both of us for so many years, have taken this route—but it is not too late to address this matter. I have extended my hand in friendship to you in great good faith and warmth, and I have no desire to in any way slander or speak ill of you in public at any time. However, for my own sake, and as a truth-journalist and avid advocate for both humanity and animals—both of which species have been harmed in these unlawful weapons-testing and neurotechnology and social harassment operations for Artificial Intelligence, military, and political repression purposes which have destroyed our lives, careers, professions, families, relationships as well as greatly harmed us physically, socially, psychologically—I will need to address this, if briefly, in writing on my

website should you feel the need to keep these posts up on your site. Please feel free to email me with your thoughts anytime, and please let me know you've removed these posts.

Thanks,

Ramola

"TARGETED INDIVIDUALS": NEVER ONE OF THEM

In yet another case of mistaken identity, my name has been exploited, over a period of many years, by large numbers of people who call themselves “targeted individuals”(aka TIs). They make false claims that I am “one of them”, and drag my name in repeatedly and profusely where it does not belong. I am a CIA whistleblower, targeted for political persecution, in a vendetta of extreme prejudice. NOT a “targeted individual”. And there is a huge difference between these categories, as I will explain (once again...)

Among the number of journalists (and others) who cover these issues, there is a tendency for them to take the party line and lump a number of issues together in one basket. Very few who speak about these issues are professional journalists. Even among those who are, most are not survivors of government operations, nor were they involved in any way, and most significantly, they are not government whistleblowers. To put it bluntly, they don't know what they are talking about, but are seeking fame and fortune at the expense of genuine victims, survivors and legitimate whistleblowers, those who have shed blood, sweat and tears, who have risked their lives to expose government corruption, have worked and fought for decades to put criminals out of business and behind bars.

Among the claims made by those promoting themselves as “targeted individuals” (including those in the many groups who are self-described members of the so-called “TI Community”) is that there is a “TI program”. Some promote the falsehood that “ALL TIs are blacklisted into this program.” Some claim that TIs are all victims of “trafficking” and/or “non-consensual experimentation”.

Quite a number of these persons make extravagant claims of being individual (specific) targets of huge black operations, involving FBI, CIA, DOD, fusion centers, etc. etc. They speak of armies of perpetrators, foot soldiers, fleets of cars, drones, aircraft, invading a neighborhood, for the purpose of singling them out, attacking them with electronic weaponry with the intent to kill them.

If this sounds absurd, that is because it is. Imagine the extent of resources, the manpower, the military hardware, it would take to deploy such a campaign, against a lone individual. Millions upon millions of dollars?

And this, against people who are not even government whistleblowers, who have never been involved in government operations, and who therefore would pose no threat which could possibly rise to the level of justifying such expenditures.

Yet these are the claims being made by a large number of people calling themselves "targeted individuals".

Making such sensationalist claims only discredits the entire subject. Anyone with even a modicum of common sense would know that such an immense operation, supposedly to "kill" one person makes no sense whatsoever.

Those who have actual experience and knowledge in these matters know that if they were hell-bent on killing someone, they could easily do so, without making a huge production out of it."
