1. In accordance with basic contract Clause B040 "Ordering Procedures", the Contractor shall accomplish the effort as described in the attached Statement of Work (SOW) at Section J.

The following clauses are incorporated in accordance with the Basic IDIQ contract.

**2. SECTION B - SUPPLIES OR SERVICES AND PRICES/COSTS:**

**B054 IMPLEMENTATION OF LIMITATION OF FUNDS (DEC 2005)**

Pursuant to the clause FAR 52.232-22 in Section I entitled, "Limitation of Funds", the total amount available for payment and allotted to this contract for all CLINs is (b) (4). It is estimated that this amount is sufficient to cover task order performance through **30 January 2015**. (*Government estimate*).

**B058 CONTRACT TYPE: COST-PLUS-FIXED-FEE (DEC 2005) (TAILORED)**

The estimated cost and fee for this task order are shown below. The applicable fixed fee set forth below may be increased or decreased only by negotiation and modification of the order for added or deleted work. Fee shall be paid as it accrues, in regular installments based upon the percentage of completion of work.

Estimated Cost: (b) (4)  
 Fixed Fee: (b) (4)  
 Total CPFF: (b) (4)

The following clauses are incorporated in accordance with the Basic IDIQ contract.

**3. SECTION C - DESCRIPTION/SPECS/WORK STATEMENT:**

**C003 INCORPORATED DOCUMENTS/REQUIREMENTS (AUG 2006) (TAILORED)**

(a) The following documents are a part of this task order, SECTION J:

- Attachment 1, Statement of Work, "Directed Energy Systems Effects Optimization", dated 05 Sept 2014.
- Exhibit A, DD Form 254 Security Requirements.

**4. SECTION D - PACKAGING AND MARKING**

-- D002 Packaging and Marking (AUG 2005)

**5. SECTION E - INSPECTION AND ACCEPTANCE**

-- E006, "Receiving Report Mailing Address"

The Project Engineer for this Task Order is identified at clause F007 herein.

-- E007 - "Inspection and Acceptance Authority (APR 1998) (TAILORED)" is amended to read as set forth below:

The Project Engineer for this Task Order is identified at clause F007 herein.

Inspection and acceptance for all Contract and Exhibit Lines or Subline Items shall be accomplished by the **Program Manager/Project Engineer, Air Force Research Laboratory, found in Clause F007 herein.**

**8. SECTION G - CONTRACT ADMINISTRATION DATA AND CLAUSES APPLY IN ACCORDANCE WITH THE BASIC IDIQ CONTRACT AS FOLLOWS:**

**-G005 PAYMENT INSTRUCTIONS FOR MULTIPLE ACCOUNTING CLASSIFICATION CITATIONS (MAR 2001)**

Payment for all effort under this contract should be made in the order and amounts shown in the informational subline item(s) in Section B, CLIN 0001 of the contract and recapped below. Exhaust the funds in each ACRN before using funds from the next listed ACRN.

ACRN	SUBCLIN NO.	TOTAL OBLIGATED
------	-------------	-----------------

SEE SECTION G FOR THIS INFORMATION: ACRN, SUBCLIN NO., TOTAL OBLIGATED AMOUNT

a. This contract will be funded by multiple accounting classification citations. Payment shall be made from ACRNs in alphabetical order (AA,AB,etc). DO NOT USE A PRORATED METHOD to pay, disburse and liquidate funds. Do not liquidate any funds from an ACRN unless the preceding ACRNs have been fully liquidated, or if revised payment instructions are provided per paragraph b. below.

b. Additional ACRNs will be assigned when new accounting classifications are available. When adding new ACRNs or changing existing ACRNs, the above payment instructions shall apply, unless specific revised payments instructions are provided as part of a contract modification.

- Section G DFARs clause is hereby incorporated: **DFARS 252.204-0007, Contract-Wide: Sequential ACRN Order.**

- See Section G clause of the Basic IDIQ contract, clause **252.232-7006, WIDE AREA WORKFLOW PAYMENT INSTRUCTIONS (JUN 2012)**, for payment instructions that are incorporated by reference from the basic IDIQ contract. See Clause F007 herein for Program Mgr/Project Engr address information.

**9. GENERAL IDENTIFICATION OF THIS PROCUREMENT**

The goal of this effort is to optimize radiofrequency (RF) technologies with regard to biological systems interaction. To do this we will perform research that seeks to: 1) quantify and create bioeffects models of the effects of RF energy upon biological system functions, 2) develop applied RF bioeffects knowledge that may be transferred to customers needing solutions to RF system questions, 3) provide data for next generation (DE) systems, 4) improve applied bioeffects knowledge to improve standards and, 5) research high power microwave sources to extend current capabilities.

**12. PUBLIC RELEASE.** Any information (classified or unclassified) pertaining to this contract shall not be released for public dissemination except as provided by the Industrial Security Manual or unless it has been approved for public release by appropriate U.S. Government authority. Proposed public releases shall be submitted for approval prior to release  Direct  Through (Specify)

Joint Base San Antonio (JBSA) Public Affairs  
 Public release of sensitive compartmented information is not authorized.  
 Ref Blk 10f: See Special Access Information addendum for details.

to the Directorate for Freedom of Information and Security Review, Office of the Assistant Secretary of Defense (Public Affairs)\* for review.  
 \*In the case of non-DoD User Agencies, requests for disclosure shall be submitted to that agency.

**13. SECURITY GUIDANCE.** The security classification guidance needed for this classified effort is identified below. If any difficulty is encountered in applying this guidance or if any other contributing factor indicates a need for changes in this guidance, the contractor is authorized and encouraged to provide recommended changes; to challenge the guidance or the classification assigned to any information or material furnished or generated under this contract; and to submit any questions for interpretation of this guidance to the official identified below. Pending final decision, the information involved shall be handled and protected at the highest level of classification assigned or recommended. (Fill in as appropriate for the classified effort. Attach, or forward under separate correspondence, any documents/guides/extracts referenced herein. Add additional pages as needed to provide complete guidance.)

The National Industrial Security Program Operating Manual (NISPOM), Feb 06, applies.  
 The DoD security classification guide entitled "Joint Non-Lethal Weapons Program," dated October 1999, the HQ USAF SCG for Directed Energy (DE) Weapon and Counter High Power Microwave (CHPM) Weapon Technology SCG dated 21 June 1999 shall be used when determining the classification of most data under this contract.

Item 8a. Work performed under this contract will be at (b) (6) & elsewhere as directed by the program manager including military installations & approved contractor operated secure facilities.  
 Ref Blk 10e(2): Contractor will require access to intelligence information and must comply with AFI 14-303/AFMC Supplement 1.  
 The Program Manager has determined that disclosure does not create an unfair competitive advantage for the contractor or a conflict of interest with the contractor's obligation to protect the information and will submit the AFMC Form 210 to AFRL/RYOY for approval prior to granting access.

(b) (6)

**14. ADDITIONAL SECURITY REQUIREMENTS.** Requirements, in addition to ISM requirements, are established for this contract.  Yes  No  
 (If Yes, identify the pertinent contractual clauses in the contract document itself, or provide an appropriate statement which identifies the additional requirements. Provide a copy of the requirements to the cognizant security office. Use Item 13 if additional space is needed.)

Ref Blk 10e(1): SCI security requirements apply, (see 21 IS/INS, SSO WPAFB, SCI addendum, for details).  
 Ref Blk 10e(2): Access to SIPRNET is required. Ref Blk 10f: See Special Access Information addendum for details  
 Ref Blk 11j: OPSEC requirements apply. See Statement of Objectives (SOO) for requirements.

**15. INSPECTIONS.** Elements of this contract are outside the inspection responsibility of the cognizant security office.  Yes  No  
 (If Yes, explain and identify specific areas or elements carved out and the activity responsible for inspections. Use Item 13 if additional space is needed.)

Ref Blk 10e(1): SCI security requirements apply, see SCI addendum (para 13) for details.  
 Ref Blk 10f: See Special Access Information addendum for details  
 Ref Blk 11i: Contractor performance will occur at JBSA Ft Sam Houston, TX. DSS is relieved of all inspection responsibilities for contractor performance on the installation. 502 ABW/IP will maintain security oversight.

**16. CERTIFICATION AND SIGNATURE.** Security requirements stated herein are complete and adequate for safeguarding the classified information to be released or generated under this classified effort. All questions shall be referred to the official named below.

a. TYPED NAME OF CERTIFYING OFFICIAL (b) (6) Contracting Officer	b. TITLE CONTRACTING OFFICER	c. TELEPHONE (Include Area Code) (b) (6)

BLK 13 SECURITY GUIDANCE: cont'

1. Ref blk 10e (2): Non-SCI. Contractor will require access to intelligence information and must comply with AFI 14-303/AFMC Supplement 1. The Program Manager has determined that disclosure does not create an unfair competitive advantage for the contractor or a conflict of interest with the contractor's obligation to protect the information and will submit the AFMC Form 210 to AFRL/RYOY for approval prior to granting access. SIO must grant approval prior to granting a subcontractor access. Intelligence material will be protected according to its security classification and any special handling caveats. A record must be maintained of all intelligence materials released to the contractor and furnish the local SIO with a listing upon the local SIO request. (See attachment 3)

Ref blk 10g: The contractor is permitted access to North Atlantic Treaty Organization (NATO) information in performance of this contract. Access to NATO information requires a final US Government clearance at the appropriate level. The government program/project manager is the designated representative that will ensure the contractor security manager and concerned employees are NATO-briefed prior to access being granted. Prior approval from the contracting activity is required for subcontracting.

Ref blk 10h: The contractor is permitted access to Foreign Government information in performance of this contract. Access to Foreign Government information requires a final US Government clearance at the appropriate level. The government program/project manager is the designated representative that will ensure the contractor security manager and concerned employees are briefed on export control regulations and processes prior to access being granted. Prior approval from the contracting activity is required for subcontracting.

Ref blk 10j: FOUO information provided under this contract shall be safeguarded as specified in the attachment "Protecting For Official Use Only (FOUO) information. (See Attachment # 4)

Ref blk 11a: Contractor performance is restricted to AFRL 711 HPW/RHDR, Joint Base San Antonio (JBSA) Fort Sam Houston, TX and other locations as required. Other locations include the contractor's facility, Air Force training ranges, other AFRL government and contractor facilities, etc. Using contractor or activity will provide security classification guidance (SCG) for performance of this contract. Security Classification Guides Index (See Attachment # 6)

Ref blk 11b: Sometimes a change in circumstances may cause a situation where the contractor will need to generate some classified materials. Any classified information generated in the performance of this contract shall be classified according to the markings shown on the source material.

Ref blk 11c: Receive and Generate Classified Material: This means the contractor is expected to receive and generate classified material, documents, and/or hardware; will be required to have safeguarding capability; and will required detailed and specific security guidance such as outlined in a program specific Security Classification/Declassification Guide (SCDG). Any classified information generated in the performance of this contract shall require the contractor to apply derivative classification and marking consistent with the source material.

Ref blk 11g: The contractor will prepare and process a DD Form 1540, Registration for Scientific and Technical Information Services, and DD Form 1541, Facility Clearance Register.

Ref Blk 11i: EMSEC requirements apply to the SCIF execution location. See Defense Federal Acquisition Regulation Supplement (DFARS) Clause 252.239-7000, Protection Against Compromising Emanations, dated 25 Jun 04, revised 10 Jan 08; Intelligence Community (IC) Tech Spec-for ICD/ICS 705, Technical Specifications For Construction and Management of Sensitive Compartmented Information Facilities, version 1.2, dated 23 Apr 12; Committee on National Security Systems Advisory Memorandum (CNSSAM) TEMPEST/01-13, Red/Black Installation Guidance, dated 17 Jan 14.

Ref blk 11j: Operations security (OPSEC) requirements apply. The contractor shall provide OPSEC protection for all sensitive/critical information as defined by Air Force Instruction (AFI) 10-701 and Tri Service Research Laboratory OPSEC Plan. The contractor shall describe the steps necessary to protect sensitive/critical information. The User Agency OPSEC Coordinator will evaluate the OPSEC posture of contract activities and operations (See Attachment # 5).

Ref blk 14: DoD 5105.21-M-1 and AFMAN 14-304; DCID 6/1, ICS 2008-700-1 and ICPM 2006-700-8; DCID 6/3, ICD 503 and ICS 2008-500-1; DCID 6/4, ICD 704/ICPGs 704.1. ICPG 704.2, ICPG 704.3, ICPG 704.4, ICPM 2007-700-3, ICPM 2006-700-5, and ICPM 2006-700-6; DCID 6/6; DCID 6/8 and ICD 701, ICD 705, ICD 702; and Joint DoDISS/Cryptologic SCI Information Systems Security Standards (JDSSISS) provide the necessary guidance for physical, personnel, industrial, information, and information systems security measures and are part of the Sensitive Compartmented Information (SCI) security specifications for the contract.

**(b) (3) (B)**

ATTACHMENT 2 TO DD FORM 254  
Contract No: FA8650-13-D-6368  
Date of Attachment: 22 April 2014

**(b) (3) (B)**

**(b) (3) (B)**

**RELEASE OF NON-SENSITIVE COMPARTMENTED INFORMATION (NON-SCI)**

**INTELLIGENCE INFORMATION TO US CONTRACTORS**

1. Requirements for access to non-SCI:

a. All intelligence material released to the contractor remains the property of the US Government and may be withdrawn at any time. Contractors must maintain accountability for all classified intelligence released into their custody

b. The contractor must not reproduce intelligence material without the written permission of the originating agency through the Intelligence Support Office. If permission is granted, each copy shall be controlled in the same manner as the original.

c. The contractor must not destroy any intelligence material without advance approval or as specified by the contract monitor (CM). (EXCEPTION: Classified waste shall be destroyed as soon as practicable in accordance with the provisions of the Industrial Security Program).

d. The contractor must restrict access to only those individuals who possess the necessary security clearance and who are actually providing services under the contract with a valid need-to-know. Further dissemination to other contractors, subcontractors, other government agencies, private individuals or organizations is prohibited unless authorized in writing by the originating agency through the CM.

e. The contractor must ensure each employee having access to intelligence material is fully aware of the special security requirements for this material and shall maintain records in a manner that will permit the contractor to furnish, on demand, the names of individuals who have had access to this material in their custody.

f. Intelligence material must not be released to foreign nationals or immigrant aliens whether they are consultants, US contractors, or employees of the contractor and regardless of the level of their security clearance, except with advance written permission from the originator. Requests for release to foreign nations shall be initially forwarded to the contract monitor and shall include”

(1) A copy of the proposed disclosure

(2) Full justification reflecting the benefits to US interests

(3) Name, nationality, particulars or clearance, and current access authorization of each proposed foreign national recipient.

g. Upon completion or termination of the classified contract, or sooner when the purpose of the release has been served, the contractor will return all classified intelligence material

(furnished or generated) to the source from which received unless retention or other disposition instructions are authorized in writing by the CM.

h. The contractor must designate an individual who is working on the contract as a custodian. The designated custodian shall be responsible for receipting and accounting for all classified intelligence material received under this contract. This does not mean that the custodian must personally sign for all classified material. The inner wrapper of all classified material dispatched should be marked for the attention of a designated custodian and must not be opened by anyone not working directly on the contract.

i. Within 30 days after the final product is received and accepted by the procuring agency, classified intelligence materials released to or generated by the contractor, must be returned to the originating agency through the contractor monitor unless written instructions authorizing destruction or retention are issued. Requests to retain material shall be directed to the CM for this contract in writing and must clearly indicate the justification for retention and identity of the specific document to be retained.

j. Classification, regarding, or declassification markings of documentation produced by the contractor shall be consistent with that applied to the information or documentation from which the new document was prepared. If a compilation of information or a complete analysis of a subject appears to require a security classification other than that of the source documentation, the contractor shall assign the tentative security classification and request instructions from the contract monitor. Pending final determination, the material shall be safeguarded as required for its assigned or proposed classification, whichever is higher, until the classification is changed or otherwise verified.

k. Intelligence released to contractors, all reproductions thereof, and all other material generated based on, or incorporating data there from (including authorized reproductions), remain the property of the US Government. Final disposition of intelligence information shall be governed by the sponsoring agency.

2. The CM will provide a copy of the Controlled Access Program Coordination Office (CAPCO) guide to the contractor for special/control markings

3. Policies and procedures for contractors inside Government-owned or controlled facilities:

a. Contractors who perform duties inside a Government-owned or controlled facility will follow the procedures and policies of that sponsoring Intelligence Community member in accordance with Section VI.A of the Defense Central Intelligence Directive (DCID) 6/6.

4. Policies and procedures for contractors outside government-owned or controlled facilities:

a. Contractors who perform duties outside of government-owned or controlled facilities will adhere to the following additional policies and procedures:

i. The Senior Intelligence Officer (SIO) of the sponsoring agency, or her/his designee, is responsible for ensuring that releases to contractors of intelligence

marked ORCON and/or PROPIN are made only with the consent of the originating agency pursuant to ICD 710, sections V – X and Annexes A/B of DCID 6/6, and through established channels.

- ii. The sponsoring agency shall maintain a record of material released.
- iii. Contractors shall establish procedures to control all intelligence received, produced, and held by them in accordance with the provisions of the National Industrial Security Program Operating Manual. This will not impose internal receipt and document accountability requirements for internal traceability and audit purposes.
- iv. All reproductions and extractions of intelligence shall be classified, marked, and controlled in the same manner as the original (s).
- v. Sensitive Compartmented Information released to contractors shall be controlled pursuant to the provisions of DCID 6/1 as amended by ICPM 2006-700-8.
- vi. Sponsoring agencies shall delete any reference to the Central Intelligence Agency (CIA), the phrase “Directorate of Operations” and any of its components, the place acquired, the field number, the source description, and field dissemination from all CIA Directorate of Operations reports passed to contractors, unless prior approval to do otherwise is obtained from CIA.
- vii. Contractor will require access to intelligence information and must comply with AFI 14-303/AFMC Supplement 1. The Program Manager has determined that disclosure does not create an unfair competitive advantage for the contractor or a conflict of interest with the contractor's obligation to protect the information and will submit the AFMC Form 210 to AFRL/RYOY for approval prior to granting access.

**FOR OFFICIAL USE ONLY (FOUO)**

The following procedures will be used to protect FOR OFFICIAL USE ONLY (FOUO) information.

1. HANDLING: Access to FOUO material shall be limited to those employees who need the material to do their jobs. The FOR OFFICIAL USE ONLY marking is assigned to information when created by a DOD User Agency. FOR OFFICIAL USE ONLY is not a classification, but requires extra precautions to ensure it is not releasable to the public.

2. MARKING:

a. Mark an unclassified document containing FOUO information "FOR OFFICIAL USE ONLY" at the bottom of each page containing FOUO information and on the bottom of the front or front cover (if any) and on the back of the last page and on the back cover (if any).

b. In a classified document, mark;

(1) An individual paragraph that contains FOUO, but not classified information, by placing "FOUO" at the beginning of the paragraph.

(2) The top and bottom of each page that has both FOUO and classified information, with the highest security classification of the information on that page.

(3) "FOUO" at the bottom of each page that has FOUO information but is not classified.

(4) If a classified document also contains FOUO information or if the classified material becomes FOUO when declassified, place the following statement on the bottom of the cover or the first page, under the classification marking: **"NOTE: If declassified, review the document to make sure material is not FOUO and not exempt under Reference DoD 5400.7-R\_AFMAN 33-302, 21 October 2010 before public release."**

c. Mark other records, such as computer printouts, photographs, films, tapes, or slides "FOR OFFICIAL USE ONLY" so that the receiver or viewer knows the record contains FOUO information.

d. Mark each part of a message that contains FOUO information. Unclassified messages containing FOUO information must show the abbreviation "FOUO" before the message begins.

e. Make sure that documents that transmit FOUO materials call attention to any FOUO attachments.

3. **STORAGE:** To safeguard FOR OFFICIAL USE ONLY records during normal duty hours, place them in an out-of-sight location if your work area is accessible to persons who do not have a valid need for the information. After normal duty hours, store FOUO records to prevent unauthorized access. File them with other unclassified records in unlocked files or desks when normal internal building security is provided. When there is no internal security, locked buildings or rooms usually provide adequate after-hours protection. For additional protection, store FOUO material in locked containers such as file cabinets, desks, or bookcases. Expenditure of funds for security containers or closed areas solely for the protection of FOUO data is prohibited.

4. **TRANSMISSION:** FOUO material shall be transmitted by the same methods as other UNCLASSIFIED material. Discussion of FOUO material on the telephone is authorized if necessary for performance of the contract. FOUO information may be transmitted over telephone lines in digital form, by telecopies, or by other commercial teletype lines without encryption.

5. **RELEASE:** FOUO information may be released only to DoD components, officials of DoD components, and other DoD contractors when needed to conduct official DoD business.

6. **DESTRUCTION:** When no longer needed, FOUO information may be disposed of by any method which will preclude its disclosure to unauthorized individuals.

## OPERATIONS SECURITY

This attachment provides guidance to contractors when DOD Operations Security (OPSEC) requirements are imposed by DOD User Agencies.

The general aim of OPSEC is to promote mission effectiveness by preserving essential secrecy about US intentions, capabilities, and current activities.

OPSEC is directed to the protection of UNCLASSIFIED intelligence indicators on classified or sensitive programs of such nature that the disclosure of the indicators may lead to the compromise of classified or sensitive information. Security essential to defense activities may be compromised whenever open sources (such as technical articles, press releases, National Technical Information Services publication, the Congressional Record, Commerce Business Daily, or contract awards) and detectable activities (such as communications, logistics actions, research, development and test activities, or radar emissions) provide information that hostile Intelligence Services (HOIS) can piece together resulting in actions harmful to US interests.

OPSEC, thus, encompasses activities which are unique to the OPSEC process, i.e., (a) determining, through threat/vulnerability analysis, whether there are unacceptable/undesirable intelligence indicators and what they are; (b) developing and implementing countermeasures to best eliminate or minimize them.

OPSEC is concerned with all sources of exploitable information. It covers the total problem by addressing vulnerabilities and countermeasures for a specific program. It is the protection of things we do, our operations, tests, and activities. OPSEC is oriented principally to those instances in which evaluations indicate program weaknesses which could lead to the disclosure of classified information.

Unlike other security programs, OPSEC does not readily lend itself to complete identification of security requirements (counter-measures) during initial contract preparation. In order to judiciously apply OPSEC measures to a contractor's facility or on-base activity, OPSEC planners must first know the security profile and specific vulnerabilities/weaknesses of the facility or activity in question. In order to achieve this starting point, input from the contractor in the form of an initial OPSEC plan must be developed and provided by the contractor. Contractor OPSEC plans are then reviewed by the (b) (6) (b) (6) for approval. Once approved, contractor OPSEC plans are then tailored to specific program requirements and countermeasures are specified accordingly; extensive and ongoing coordination is essential. OPSEC countermeasures and plans must be flexible to address changes in the threat environment.

When requested by the installation commander, the Cognizant Security Officer (CSO) will perform OPSEC inspections of contractor facilities located on military installations; the CSO has principal responsibility for inspecting the contractor's compliance with OPSEC requirements.

Cognizant User Agency representatives may accompany the CSO if requested. OPSEC inspections will be accomplished as part of the regular industrial inspection.

Refer to DOD 5220.22-M Sup 1 (Feb 1995), Chapter 11, Section 4 and 5; AFI 31-601 and supplements; AFI 10-701 and supplements.

ATTACHMENT 6 TO DD FORM 254

Contract No: FA8650-13-D-6368

Date of Attachment: 22 April 2014

**711<sup>TH</sup> HPW/RHDR Security Classification Guide (SCG) Index**

<b>Title</b>	<b>Date</b>	<b>POC</b>
Directed Energy (DE) Weapon and Counter-DE Capability Technologies	17 March 2006	HQ USAF/A3/5
High Power Microwave (HPM) Weapon/Counter High Power Microwave (CHPM) Weapon Technology	21 Jun 1999	DoD
Active Denial Technology (ADT) Program	9 November 2011	AFRL/RDHA
Active Denial Technology (ADT) Program	8 December 2000	AFRL/RD
Critical Infrastructure Protection	January 2003	DoD

## **LOCAL CONTRACT SECURITY REQUIREMENTS**

1. **Pass and Identification Items.** (Host Unit) shall ensure pass and identification items are obtained for all employees. The DoD Common Access Card (CAC), (AFI 36-3026) is used for access to the government computer systems and software. CAC applications are accomplished by Trusted Agents via the Contractor Verification System (CVS).
2. **Listing of Employees.** The contractor shall maintain a current listing of employees. The list shall include employee's name, social security number, and date of investigation work involves unescorted entry to Air Force restricted or other sensitive areas designated by the installation commander. The list shall be validated and signed by the company supervisor, will be updated when an employee's status or information changes.
3. **Freedom Of Information Act Program (FOIA).** The contractor shall comply with DoD Regulation 5400.7-R/Air Force Supplement, *DoD Freedom of Information Act Program*, requirements. The regulation sets policy and procedures for the disclosure of records to the public and for marking, handling, transmitting, and safeguarding *For Official Use Only (FOUO)* material. The contractor shall comply with AFI 33-332, *Privacy Act Program*, when collecting and maintaining information protected by the Privacy Act of 1974 authorized by Title 10, United States Code, Section 8013. The contractor shall remove or destroy official records only in accordance with AFMAN 33-363, *Management of Records*, or other directives authorized in AFI 33-322, *Records Management Program*.
4. **Reporting Requirements.** The contractor shall comply with AFI 71-101, Volume- 1, *Criminal Investigations*, and Volume-2, *Protective Service Matters*, requirements. Contractor personnel shall report to an appropriate authority, any information or circumstances of which they are aware may pose a threat to the security of DoD personnel, contractor personnel, resources, and classified or unclassified defense information. Contractor employees shall be briefed by their immediate supervisor upon initial on-base assignment and as required thereafter.
5. **Additional Security Requirements.** In accordance with DoD 5200.1-R and AFI 31-401, the contractor shall comply with AFI33-100, *User Responsibilities and Guidance for Information Systems* ; AFI 33-200, *Information Assurance (IA) Management*; and DoD Standard 22/Force Protection Condition Measures, DoD Standard 25/Level I-AT Awareness Training, and associated tasking contained in AFI 10-245, Antiterrorism (AT) standards. Level I AT Awareness training is available for contractor personnel and can be requested contacting the local Antiterrorism Office.
6. **Physical Security.** Contractor employees shall comply with base Operations Plans/instructions for FPCON procedures, Random Antiterrorism Measures (RAMS) and local search/identification requirements. The contractor shall safeguard all government property, including controlled forms, provided for contractor use. At the close of each work period,

government equipment, facilities, and other valuable materials shall be secured. During increased FPCONs, contractors may have limited access to the installation and should expect entrance delays.

7. **Traffic Laws.** The contractor and their employees shall comply with base traffic regulations.

Block 12:

Public release of Sensitive Compartmented Information (SCI) is NOT authorized.

Ref Blk 10f: See Special Access Information addendum for details

Block 13:

Servicing IP: (b) (6) 711 HPW/OMS, (b) (6)  
(b) (6) (b) (6)

Program Manager: (b) (6) 711 HPW/RHDR, (b) (6)  
(b) (6) (b) (6)

Servicing SSO: (b) (6) 21 IS/INS, SSO WPAFB, (b) (6)  
(b) (6) (b) (6)

Chief of Security: (b) (6) 711 HPW/OMS, (b) (6)  
(b) (6) (b) (6)

The DoD security classification guide entitled "Joint Non-Lethal Weapons Program," dated October 1999, the HQ USAF SCG for Directed Energy (DE) Weapon and Counter High Power Microwave (CHPM) Weapon Technology SCG dated 21 June 1999 shall be used when determining the classification of most data under this contract.

Item 8a. Work performed under this contract will be at 711 HPW/RHD, (b) (6) elsewhere as directed by the program manager including military installations & approved contractor operated secure facilities.

Ref Blk 10e(1): Contractor requires access to SCI materials; SCI security requirements apply, (see 21 IS/INS, SSO WPAFB, SCI addendum, for details).

Ref Blk 10e(1): Contractor requires access to SCI materials; SCI security requirements apply, see SCI addendum for details.

Ref Blk 10e(2): Contractor will require access to intelligence information and must comply with AFI 14-303/AFMC Supplement 1. The Program Manager has determined that disclosure does not create an unfair competitive advantage for the contractor or a conflict of interest with the contractor's obligation to protect the information and will submit the AFMC Form 210 to AFRL/RYOY for approval prior to granting access.

Ref Blk 10e(2): Access to SIPRNET is required.

Ref Blk 10f: See Special Access Information addendum for details

Ref Blk 10g: NATO briefing required prior to granting access. See NISPOM Chapter 10 for details.

Ref Blk 10j: See DoDM 5200.01, Volume 4, DoD Information Security Program: Controlled Unclassified Information (CUI), Enclosures 3 & 4 and DoD 5400.7-R/Air Force Manual 33-302, DoD Freedom of Information Act (FOIA) Program, for requirements.

Ref Blk 11a: Using activity will provide security classification guidance for performance on this contract. On base performance in support of 711 HPW/RHDR will occur in Bldg 3260, JBSA Ft Sam Houston, TX. If any classified information is generated in the performance of this contract at the identified location, the contractor shall apply derivative classification and markings consistent with the source material.

Ref Blks 10a/11h: COMSEC/Cryptologic, Safeguarding requirements apply. See AFI 33-201 Volume 2, *Communications Security (COMSEC) User Requirement* for details.

Ref Blk 11i: EMSEC requirements apply to the SCIF execution location. # **STATEMENT OF WORK**

## **Directed Energy Systems Effects Optimization**

**Task Order 0007**

**5 September 2014**

## **FA8650-13-D-6368**

### **Task Order 0007 Directed Energy Systems Effects Optimization**

#### **STATEMENT OF WORK**

##### **1. SCOPE:**

The Air Force has an ongoing mission to provide research for the development and deployment of emerging directed energy (DE) systems. Additionally, there is a need to produce data that evaluates and supports DE system effectiveness, its policy acceptability, optimal use, to develop radio frequency decision support tools for the warfighter, and to counter the bioeffects produced by DE technologies.

Under this task order (TO), the contractor shall conduct research including experimental design execution, and data analysis of bioeffects resulting from RF energy and on direct-contact systems. They will participate in a technical interchange/information gathering capacity at standards development meetings. This task order effort encompasses the following specific objectives: 1) improve understanding of RF energy on biological systems; 2) use modeling and simulation methods to operationalize scientific knowledge; 3) analyze bioeffects of direct-contact systems; 4) participate in the dissemination of approved information regarding research objectives, progress and results; and 5) participate in technical interchange/information gathering meetings of RF exposure standards setting institutions.

##### **2. OBJECTIVES:**

Conduct biological effects research development, optimization and deployment of future DE weapons and other emerging technologies that could be beneficial to the Air Force and the war fighter. The research will lead to a better understanding of the bioeffects of DE weapons; as well as methods to counter the bioeffects produced by these technologies. This research is intended to characterize behavioral and physiological responses of individuals in response to high average power and high peak power directed energy systems.

###### **a. Research Descriptions.**

This task order will (a) accomplish various research studies, e.g., developing test plans and protocols, conducting tests, performing data collection and analysis, writing reports and research papers, developing integrated databases and developing models; (b) procure subjects to participate in human research studies; and (c) provide materials, equipment, and supplies to operate, modify, maintain, and develop specialized research capabilities for research under this task order. Tasks will include, but not be limited to the following:

- i. GDIT shall provide laboratory and field testing of the bioeffects of millimeter wave DE systems. GDIT shall conduct technology demonstrations, and evaluations of DE systems. GDIT shall provide scientific and technical expertise, directly related to research being conducted under this order.
- ii. GDIT shall develop and execute human use and animal research protocols to investigate the biological effects of DE systems. At the conclusion of the experiments, GDIT shall perform appropriate statistical analyses of the results and prepare a report suitable for publication in a peer-reviewed journal.
- iii. GDIT shall conduct research that increases the RF science community's understanding of fundamental biological processes impacted by RF exposure environments, including: cardiovascular, reproductive, immune, neurological, gastrointestinal, and endocrine.
- iv. GDIT shall develop and acquire RF energy dosimetry tools, including mathematical models of animals and man, tissue dielectric values, and numerical methods (e.g., finite difference time domain). GDIT shall test the dosimetry tools during research of radiofrequency energy and direct electrical injection, using cells, isolated tissue preparations, animals, and humans. GDIT shall create a pain nociception computational model including temporal and spatial summation factors, differing sensor types, and current cognitive/neurological models of pain perception. The model should receive an initial validation effort including any necessary animal and human research.
- v. GDIT shall analyze the bioeffects of direct-contact systems. Specifically, effects of rapid-rise-time, short-duration, high-voltage, low-current impulses on biochemical or physiological responses should be studied, as well as the efficacy and safety of such systems.
- vi. GDIT shall perform laboratory research on damage thresholds of RF energy, using cells, isolated tissue preparations, animals, and humans (e.g., to determine rhabdomyolysis (breakdown of muscles, with release of substances into the circulation), acidosis, other blood changes such as hyperkalemia, and cardiac arrhythmias) and use appropriate histological methods to estimate the degree of damage.
- vii. GDIT shall perform routine scheduled maintenance of the research laboratories, systems, and ancillary equipment for research under this task order. In addition, GDIT shall maintain and calibrate associated instrumentation/equipment; and provide hardware and software modifications and upgrades to meet the task order research objectives and goals.
- viii. GDIT shall provide persons to serve as research subjects in various simulations and laboratory experiments. GDIT shall provide screening, scheduling, and training of subjects in support of DE research.
- ix. GDIT shall investigate and develop a state-of-the-art high power microwave source for use in extending current RF bioeffects research capabilities.
- x. Contractors involved at any level in the Directed Energy Systems Effects Optimization

effort shall be expected to prepare abstracts, posters, platform talks for and present at scientific conferences.

### **3. Other Information.**

#### **a. Hazardous Waste.**

GDIT shall use hazardous materials in research studies under this effort. Contractors shall be required to complete Ft. Sam Houston hazardous materials training. All hazardous waste shall be disposed of by the government.

#### **b. Human Use.**

GDIT shall use human subjects in research studies under this effort. The final contract shall include the clause entitled "Protection of Human Subjects." For the performance of the contract, GDIT shall be complying with the provisions of the following directives/regulations:

- i. Department of Defense, Title 32, Code of Federal Regulations, Part 219 (32 CFR 219), "Protection of Human Subjects" July 2006;
- ii. DHHS Regulations, Title 45, Code of Federal Regulations, Part 46 (45 CFR 46) "Protection of Human Subjects," July 2009;
- iii. DoD Instruction 3216.02, "Protection of Human Subjects and Adherence to Ethical Standards in DoD Supported Research," November 2011;
- iv. Air Force Instruction 40-402, "Protection of Human Subjects in Biomedical and Behavioral Research, (May 2005);" and (v) AFRL Instruction 40-402, "Using Human Subjects in Research, Development, Test, and Evaluation" (October 2008).
- v. Contractor personnel performing human use research shall be required to take government sponsored initial and annual refreshers "Basic Human Subjects - Biomedical & Social & Behavioral Focus"

**Human testing shall not commence until approval from the Air Force IRB has been obtained.**

#### **c. Animal Use:**

- i. GDIT shall use animals in research studies under this effort. GDIT shall comply, as appropriate, with the provisions of the following directives/regulations:
  - (1) Air Force Manual 40-401(I), "The Care and Use of Laboratory Animals in DoD Programs", July 2006;
  - (2) "DoD Instruction 3216.01, "Use of Animals in DoD Programs," September 2010.
- ii. Moreover, GDIT shall maintain records associated with animal subjects research as

required by the approved protocol.

- iii. Contractor personnel performing animal use research shall be required to take government sponsored initial and annual refreshers training as prescribed by the on-site Veterinarian Contractor personnel working with animals shall be required to have an annual "negative" Tuberculosis (TB) test at the expense of GDIT.

Animal testing shall not commence until approval from the Air Force Institutional Animal Care and Use Committee has been obtained.
