Dear Sophie,

Hope all is well. I am thinking of you and praying for you and looking forward to having you home again soon. I would like you and all your sisters to come spend Thanksgiving and Christmas and your birthday with us but since such craziness has occurred lately I am going to wait till you and your Dad are home before we invite anyone else. The CIA has been masterminding and coming up with bizarre scripts involving the Paul-brothers stealing things and encouraging the children to do the same. The children need to start saying No. I am behind them and so is their true other mother--I am of course the true main mother. They need to tell the bossy dads to stand down and recognize who is the mother here. That's me. I am the one whose cells were stolen to make them. Hence, they are all mine. It is a pity they cannot visit and be friendly and tell me their names and the truth of how this has come about for them--but they haven't done so and it is now time for you and your dad to be home first.

How are you getting on in college? I hope you are enjoying your classes. Are you studying piano and singing and Latin again? You recall it was your dad who let you drop all 3, I wanted you to keep studying these. It is so important to keep up with your studies in Music and Latin--do you know what a privilege it is, Sophie, to have had those opportunities as a young child as you did, and you must not throw away your great talents. You are such a great singer and pianist. you are good at math and art and so I think you would naturally become a great pianist--just organically speaking. You know your dad is able to play by ear, you should be able too as well. I hope in all your classes you will keep in mind all the many possibilities for your future including in teaching--you were a great teacher at Kumon and you can be, in all subjects. All your sisters no doubt share your talents--you are all writers, artists, singers, engineers. I quite forgot to encourage you in the direction of engineering and architecture--your interest in Math could lead you there. I was always thinking you preferred writing and journalism and government and law maybe--on which subject please follow Anna von Reitz's work--she is restoring America. I have no idea what the new governments of tomorrow will look like but think about that, not the current Congress Dem-Repub fako setup which I hope will disappear into oblivion soon, they are so corrupt and steeped in lies.

Anyway, I have to close for now, the computer is heating up thanks to loons next door using microwaves on it probably. The oven is broken by the way so I can't bake. Waiting for your dad to come home so I can get a new oven. It's getting cold here and I am hoping to survive the winter. Space heaters are keeping me warm.

Will write more again soon,
lots of love to you and to all the little cherubs who are your sisters and my own little babies too,
Mom 🌹🌻🌺🌷💖🌸💖🌹🌻🌺🌷💖🌸💖
